

LIVE GLOBAL SUPPLY CHAIN SITUATIONAL AWARENESS

If your supply chain is global, then you must have transparency to its performance and behavior, in real time, anywhere on the planet.

Value of Live Situational Awareness

1 Transparency

See, understand, and improve performance in ways you cannot today using real time information from the supply chain's ecosystem, external events and enterprise systems.

2 Proactiveness

Intervene early to avoid costs, mitigate risks, collaborate cross-functionally and with trading partners based on automated exceptions driven by machine learning, artificial intelligence and 'fit for purpose' heuristics.

3 Outcomes

Improve customer service, turns in working capital, cost, revenue, margins and the ability to resist and recover from disruptions.

Validated Outcomes

\$25M

In cost avoidance due to proactive intervention to save shipments – Top 5 global pharmaceutical company.

Proactive customer service for **270K+ daily deliveries** using live courier tracking, digital proof of delivery and automated notifications across **19K routes** – World's largest pharma distributor.

95% OTIF

Improve customer service by 3% and recalibrate inventory/safety stock levels during a transition from an 85% air freight delivery model to an 80% ocean freight model – leading global electronics manufacturer.

Keys to Unlocking Value and Driving ROI

1 Top-Down Approach with Senior-Level Sponsorship

- Build Business Case
- Detail Use Cases
- Get User Requirements
- Assess Data Readiness
- Capabilities Map
- Activate and Test
- User Adoption & Rollout

2 Global End-To-End Scope Enhancing Cross-Functional Collaboration and Regional Execution

3 Continuously Improve Sales, Service, Cash, Cost, Sustainability and Security Outcomes

Founded in 2012, TransVoyant is purpose built to turn complex supply chains into a competitive advantage. The digital world changes each day. We enable visionary customers to profit from this change.
