

TRANSVOYANT

Final Mile Delivery

CUSTOMER CHALLENGES

NO customer confidence in promised delivery times

NO proactive alerts and intervention to prevent customer delivery problems

NO means to provide real-time and historical delivery process and proof of delivery to customers, insurers or regulators

NO automated platform to orchestrate complex, high-volume, temperature controlled last mile delivery

NO ability to pay transportation network based on delivery performance

TransVoyant orchestrates complex last mile delivery networks providing a turnkey service to our customers and their customers

Ready to get started?

Please contact us today to schedule an information session to discuss how TransVoyant can improve your customer service and financial performance.

CUSTOMER VALUE:

Customer Service

Revenue Protection

Regulatory Compliance

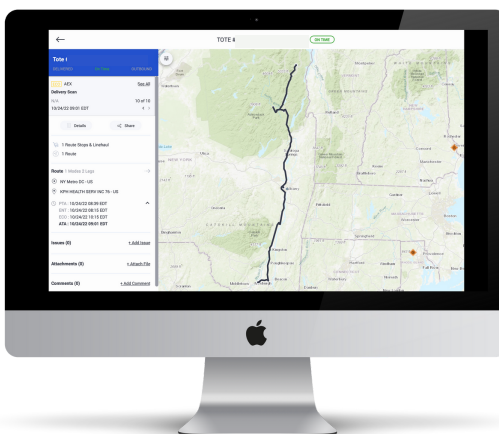

Cost Reduction

24/7 FINAL MILE SERVICE:

- Monitor and intervene on our customers' behalf before delivery or temperature performance deviates from plan or their customer's expectations
- Actionable delivery network intelligence to identify gaps and improve performance
- Order fulfillment status, estimated delivery times, and live in-transit updates, including early-late notifications for you and your customers
- Continually measure and intervene to improve delivery performance and data quality of the transportation network

POWERED BY THE TRANSVOYANT PLATFORM:

- Connected, continual orchestration of final mile delivery network (pre-ship, in-transit, delivered)
- Automated exceptions and notifications based on customer business rules and conditions
- Seamless and secure integration to any sensor or IoT device
- Accurate predicted arrival times, real-time progress updates, continuous temperature compliance, and auditable proof of delivery
