

Rapid Digital Transformation for Logistics Service Providers

Precise Predictive Enterprise (P2E) offers Logistics Service Providers (LSPs) the ability to rapidly and cost-effectively digitally transform the way they serve customers without the project and financial risk of building the capabilities. It also provides the ability to increase the pace of innovation to continuously improve service thus, improving the ability to compete in an increasingly competitive market.

TransVoyant P2E is a modern purpose-built solution that runs in the cloud. The architecture is highly scalable, secure, configurable, and easy to maintain. The intuitive customer experience is supported by advanced analytics, API connectivity, data lake and data-stream processing capabilities that fuse a customer's enterprise data with its trading partner ecosystem data and the external global events that surround the logistics operations.

BENEFITS:

Innovate
to drive new services and revenue streams

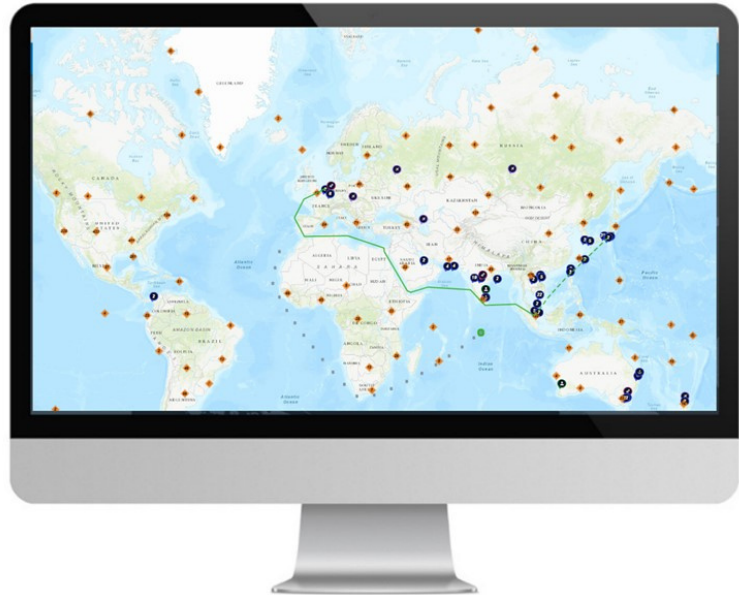

Automate
to reduce time, resources, and cost

Provide
continuous performance improvement

Offer customers new ways to SEE, UNDERSTAND and IMPROVE their ways of working with your support teams
